# *Firstly, Congratulations!*

On deciding to get married and thank you for your interest in my Wedding Photography I hope you find the brochure of some help if however you need to ask any questions please feel free to call as I believe in giving every couple the individual treatment or 'personal touch' from beginning to happily ever after, no conveyor belt treatment.

As I only undertake one Wedding per day dates in my diary are booked many months in advance up to 2 years.

This full friendly personal and professional service enables me to devote the right amount of time to your photography treating you as I would expect to be treated myself. To avoid disappointment, please make an appointment to discuss your requirements and view my work in the comfort of my studio premises where there are many examples on display to browse through whilst enjoying a coffee.

On all bookings taken I offer a complimentary photo session which is a great opportunity to get to know each other and the images from the shoot are yours to keep, recent couples have even used them for their invitations, the shoots have even taken place on location in the grounds of their chosen venue to add to the whole story.

Communication and feeling at ease will gain great results, remember, all you have left after your big day is each other, fantastic memories and your wedding photos, and as a full time professional member of the Master Photographers Association with many awards to my name your wedding day is an honour to photograph and that is why I believe each wedding should be treated as unique.
